

Khabeer Narsai

Pretty much to say anything you

what you thinking about?

Lauren

definitely think is very like

involved or

interactive This was very interactive like saying like tap here to see what goes on so I thought it was really good. So is this a clean bottle tap yes tap no, so if it's not a clean bottle so does clean mean like

Khabeer Narsai

it hasn't got any liquid in it

Lauren

any liquid or is like that mean like the difference between Gatorade and water, water is kind of clean Gatorade is not.

Khabeer Narsai

so it's just really just like liquid in the bottle of any liquid left and the bottom

Lauren

ill say no.

please clean the bottle is the bottle is clean up yes. Okay cool. See it's empty yet. Do you have some way to

empty it?

Khavveer Narsai

Yeah, so yeah, like a little like red bin sort of area and sink area

Lauren

to metal plastic gloss

separate the item and put them into the bin

Okay, so let me finish (looking very confused how where to put the items)

Khavveer Narsai

so on this screen here to put it.

So, so on these screens here, what the idea of it is it's you bottle and a lid and it separates out each of those bins? Okay, fine. Whatever it is, it's going to say two different numbers there. Yeah. It is what it is. So that's going to be mirrored on the bin that is next to you. Yeah. So there's five different bins and red bin as well to use. or five minutes including the red beans. So they light up

Lauren

Oh, that's really cool.

Khavveer Narsai

Yeah, so it tells you that the bottle goes into this bin here. So it makes sense.

Lauren

Yeah.

Khavveer Narsai

do you have like anything that's weird about it.

Lauren

Not pretty straightforward.

Possibly I don't I have like color would be really good it's really very black and white

Khavveer Narsai

so its just a wireframe to look at like the steps involved. Yeah and like how the interaction feels.

Lauren

okay cool. They want to try

another one or

Khavveer Narsai

you can if you want yeah do you feel like it's too clunky or anything wants to go

Lauren

now Do I really like how it's like a game to like a mind map to get through I thought that was really coolof Okay, cool. So let's go through let's go takeaway containers beacuse I feel like that would be more complicated. Is the product claim? Yeah, I cleaned up my container. Okay, so container and then the lid separately. Okay, well what is its is conjoined like one that just folded and popped in and unopens.

scissor? Okay.

So then that's done because I put the container and then leading three and four.

Khavveer Narsai

once you're done with everything yeah

Lauren

Why do you the tree?

Khavveer Narsai

So the tree is like the example of in this photo here. So as you throw something instead of being blacksmith towards the tree, so you're part of the collaborative effort. So it shows that you're joining the community sort of thing.

Lauren

nah i thinkg its good very well laid out very simple, really good. So you could even get like young kids involved in it. Which I think will be really good as well, too. Because you gotta start with the younger generation to get this to follow on during the rest of the life. Yeah, and help out planet down future

Khavveer Narsai

Cool. Cool.

If you confused about anything?

Lauren

like very straightforward, very easy to you. That's coming from a dummy like me. I'm not very simple, very easy and straightforward. It wasn't complicated or anything like that at all. I really liked a layout, Testing was fun.

Yeah.

Khavveer Narsai

Thank you.

Lauren

Your Welcome.
