

Me

Okay so we have made a quick prototype of a screen we're trying to build for recycling. So, by using this screen, you should be able to figure out how to recycle an item you have. Anyway, so here it is. Imagine you just got some takeaway food and now you're trying to recycle it. Try use this design to help you...recycle that item.

Robbie

So I'm gonna recycle a takeaway container. Okay why is this not working? Did I do something wrong or -

Me

No, so some pathways haven't been linked yet so for now just try tap the blue boxes that show up.

Robbie

Okay, so there's a little arrow that's connecting the two. So it makes it look like it's a drag and drop. But when I drag this comes up on the screen, so I'm assuming that I need to? I have been, I have already finished but there was no feedback that I'd done it like this.

Me

Like, there was no visual feedback or sound or anything...?

Robbie

Yeah. So I guess I finished.

Me

So here - thank you for recycling. Here there's an image of a tree which is currently not here.

Robbie

Okay, cool. What else should I recycle?

Me

Up to you - is there anything else you want or need to recycle? Are you done?

Robbie

Yes, I'm done.

Me

Okay, you're done then. Thanks for the feedback.
