

Khavveer Narsai

Just to have a play with it and voice every thing you are thinking even try to talk what you're doing in the process wise place.

Belle

I guess that does cover everything you find in a food court. (looking at all the items to pick from)

Khavveer Narsai

most items in a food court yeah.

Belle

food waste, just go straight to bin five.

Okay, and then

recycling

plates and cutlery. So do I have to individually select everything I want to put it in the bin?

Khavveer Narsai

Yeah.

Belle

And then I'll individually Tell me where I need to put it on paper in bin one plastic in bin five.

No. (going through the steps of bottle)

Okay, bottle goes in the bin lid goes in bin three. Okay.

It's very long process to have to recycle everything. Yeah. So is there going to be like, Is there going to be one for the whole food court or is there can be several

Khaveer Narsai

different opinions a couple screens around it. So you can access them through a couple screens as well. Also the bins aren't closed if you don't use the screens, so you can soon as the bins

Belle

so what do people throw it in the wrong one then?

Khaveer Narsai

the whole idea is for research we found most people are actually keen on recycling.

Belle

Mm hmm.

Khaveer Narsai

They're just not sure so much information around them. And I'm sure what can and cannot be recycled. So this is more of a tool to help people understand How

Belle

is it going to impact the whole lot of rubbish if someone throws the wrong thing around being?

Khaveer Narsai

Not particularly because it's sorted at a factory anyway

Belle

okay

so I just tap tap tap and it tells me what bin to put it. Thats kind of boring sorry. Yeah, like I don't know there's not like it's the animations there's kind of nothing to it's kind of confusing like if it's my first time using it I just wouldn't use it. I would just get bored, I would just throw it in any bin I wouldn't take my time if I'm in a rush I'm not meh let oh ive got a take away container which been should I put it in? I'll put my container and bin three and my lid in bin four. Okay, does does each been explain what each bin does? So

Khavveer Narsai

kind of but not really. The whole idea of it is the the different addition of extra bins results in more segregation so you can see two to separate out each part individually so it's not just all what I take the little pf this bottle but still put it in the same being type situation.

Belle

Okay. So is there a reason there's five different bins? Like, I know all the food waste goes in bin five if I can see that. But why are five different bins?

Khavveer Narsai

to just get a separation part of it easier. So we can have like like items like paper stuff that goes into the one time in plastic items goes into the one type bin, stuff like that.

Belle

And if something's dirty, it's just going to Straight in been five

Khavveer Narsai

most cases yes but in stuff like when it comes to bottles the

liquid after bottle so

Belle

if i empty the liquid out of the bottle it's clean technically

Khavveer Narsai

techneicly clean. Yeah.

Belle

So is that going to specify in this thing?

Khavveer Narsai

Wording would change a little bit to pur liquid out or empty bottle

Belle

and then it's considered clean didn't get recycled,

Khavveer Narsai

according to the New South Wales Government.

Belle

Okay.

Khavveer Narsai

Do you think he would benefit from being like matching what's at home for you like having just a yellow bin and red bin.

Belle

a little bit more than that at home. But I guess it makes the difference. But again, everyone's going to have to join in and do it's going to have to be a community effort, not just a couple of people doing it like also I see when you finish you get to see a new leaf grow from the tree. Am I going to see that before I start this process?

Khavveer Narsai

So you see like what

other people are using the band in the whole process of leaves getting added. So just be around you in public anyway. So what I do is the trees and aesthetic within that can interact or could entice you to use it.

Belle

Is it just going to be growing trees? Is there going to be anything more than that?

Khavveer Narsai

No, really, it's just just a little

Belle

more of an intrinsic motivation kind of activity. Yeah.

I think a lot of people are going to be intrinsically motivated to use it, but it's a good step in the right direction.
